

ADDENDUM THETFORD HOB INSTALLATION MANUALS

For all hobs & combination units (hob & sink) this addendum replaces instructions related to the installation cabinetry dimensions described in chapter 6. *Position and placement* of the installation manual of the hob.

Picture 1: cabinetry locations

Make sure the installation is according to the following, referring to the distances indicated in *table 1: ventilation & protection dimensions*

- Apply a minimum distance (A) from the lowest point of the hob, in all scenarios. And where the underneath of the hob is exposed, then a non-combustible heat shield at point A is mandatory.
- Create a gas drop hole (B), which must vent to the outside of the leisure vehicle.
- It is strongly recommended to cut a slot in the cabinet under the front of the worktop (C), to dissipate heat from under the appliance.

Table 1: ventilation & protection dimensions

A in mm	B in mm	C in mm
30	25-50	8x100
